

NOTICE TO OUR READERS

Health Services Reports will begin publishing on a bimonthly basis in 1974. This reduction from 10 to 6 issues a year was necessitated by various operational factors. However, we will endeavor to continue to uphold the journal's 95-year-old tradition of publishing significant papers in the fields of public health; community medicine; health economics, research, and planning; and the delivery of health services.

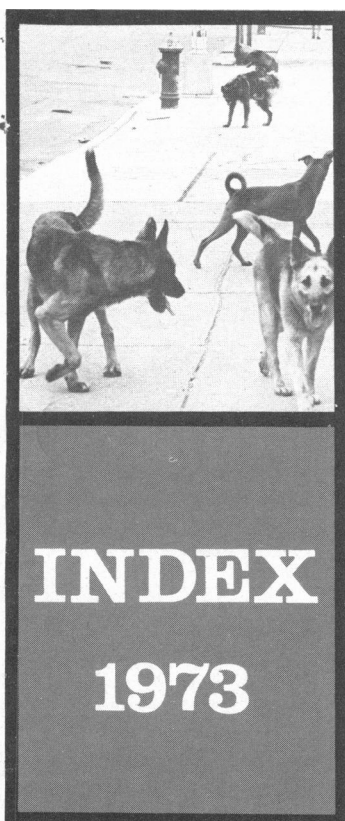

Because the journal will be pub-

lished only 6 times a year, the subscription price has been proportionately lowered. The new rates are \$10.10 per year for subscribers in the United States, \$12.65 per year for overseas subscribers, and \$1.75 per single copy. Subscriptions are accepted for 3-year periods for the convenience of subscribers. Payment for subscriptions (check or money order) may be sent to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Cover: Typical clinical activities in nuclear medicine laboratories of remote hospitals and the relationship of these hospitals to the central analysis facility, which are described in "A Nuclear Medicine Information System," beginning on page 908.
